Hard Skill

- Java
- Spring Boot
- PostgreSQL
- RESTful APIs
- Microservices
- Git for version control
- JUnit and Mockito for testing
- Postman for API testing
- H2 Database

Soft Skill

- Time Management
- Problem Solving
- Communication
- Continuous Learning

Education Background

- Sri Eshwar College of Engineering
B.E Electronics and Communication Engineer
2016-2020
CGPA: 8.08
- AGN Matric Hr.Sec School
HSC-2016
Percentage: 85.9%
- AGN Matric Hr.Sec School
SSLC-2014
Percentage: 92%

Professional Experience

Capgemini Technology | Senior Software Engineer
Dec, 2020 – Present

Project: New Generation Consumer Banking

Role: Support

In my role as a support professional within the New Generation Consumer Banking initiative, I function as a claim handler. My responsibilities involve adding and/or updating comprehensive information on claims. More precisely, I play a key role in executing a workflow aimed at initiating disputes for transactions associated with specific cards, encompassing both fraudulent and non-fraudulent scenarios.

Responsibilities:

- Individual Contribution: Actively involved in tasks related to the project as an individual contributor.
- Coding and Maintenance: Responsible for coding activities and ongoing maintenance of the system.
- Application Deployment: Engaged in the deployment process to ensure smooth application functionality.
- Customer Coordination: Collaborating with customers to address queries and ensure seamless communication.

Environment: Leveraging tools like Spring Tool Suite, IntelliJ, Postman, and version control systems such as Git. The project encompasses the administration of databases using PostgreSQL and MySQL DB.

Project: Nutrition (Healthify) App Project

Role: Java Full Stack Developer

As a Java Full Stack Developer working on the Nutrition (Healthify) App Project, I played a pivotal role in advancing both front-end and back-end development, ensuring the comprehensive completion of the entire codebase.

Responsibilities:

- Main Responsibility: Thoroughly comprehending project requirements and crafting the required code. Extensive Java Development: Involved in
- complete code development utilizing Java.

Environment: Utilizing tools like STS (Spring Tool Suite), Eclipse, Swagger, and overseeing databases via PostgreSQL (pgAdmin). Postman was employed for testing and validation activities.
